## Functioning Principals

### 1 Minimum Air Grille Sections

To obtain acceptable noise levels at maximal blower speed minimum requirements for grille and ducts sections should be observed. The size of the transition box behind the supply air-grille is also important.

FCF Model	Supply Air Grille Model / Section cm <sup>2</sup>	Return Air Grille Model / Section cm <sup>2</sup>	Duct Diameter
5.000 Btu	1 x 10 x 4" 190 cm <sup>2</sup>	1 x 11 x 8" 490 cm <sup>2</sup>	100 mm (4")
9.000 Btu	1 x 12 x 4" 235 cm <sup>2</sup>	1 x 11 x 8" 490 cm <sup>2</sup>	100 mm (4")
12.000 Btu	1 x 10 x 5" 250 cm <sup>2</sup>	1 x 14 x 7" 550 cm <sup>2</sup>	125 mm (5")
16.000 Btu	1 x 12 x 6" 390 cm <sup>2</sup>	1 x 14 x 10" 800 cm <sup>2</sup>	125 mm (5")
or 16.000 Btu	2 x 10 x 4" 380 cm <sup>2</sup>		125 mm (5")

### 2 Blower Outlets

90° turns with flexible ducts directly from blower outlets should be avoided at all costs as they introduce severe restrictions in the air-flow. All FCF blowers can be rotated through 45° steps to obtain a straight-line outlet from the blower. This facility should be used whenever possible.

### 3 Return Grille Offset

It should be avoided to place a return air grille directly opposite the finned coil surface of an air-handler, because this will allow propagation of direct blower-motor noise through the grille. The grille should be offsetted to chicane the return air to the coil inlet. Direct noise propagation will be reduced in a significant manner.

### 4 Duct Type

Webasto recommends insulated ducting for all installations, to reduce condensation. To avoid accidental crushing, flexible air-ducts should be of high quality with sufficiently strong steel spiral reinforcement. Spiral type ducts should be extended to their maximum length for the best interior smoothness.

### 5 Large Vessel Requirements

In general requirements for large vessels are even more stringent than the table above. These special requirements can be obtained from Webasto on request.

In order to customize the wooden air grilles on page 13, please choose from the following wood options:

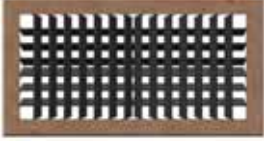

Example: WBCL004004x    WBCL0040040 = *Teak* Air Grille 12 x 5    WBCL0040042 = *Mahogany* Air Grille 12 x 5

Suffix	Wood Type	Description	Suffix	Wood Type	Description
0	Teak	Asian Teak	7	Maple	American soft Maple
1	Cherry	American Cherry	8	Beech	American Beech
2	Mahogany	Honduran Mahogany	9	Cedar	Spanish Cedar
3	Ash	American white Ash	10	Makore	African Cherry
4	Oak	American white Oak	11	Hickory	American Hickory
