

The following information explains which components have been modified or deleted to create the 600 series sunroof.

1. Switch bracket comes loose in the box.
2. Wiring harness comes loose in the box.
3. Rocker switch instead of a user interface.
4. One piece interior mechanism cover instead of scissor style.
5. Exterior mechanism cover on glass panel eliminated.
6. Retraction mechanism slide eliminated. (Retraction mechanism is used as a track cap only)
7. Wind deflector eliminated. (Can be purchased as an accessory)
8. Warranty - 3 years 36,000 miles parts only.
9. User manual (Changed to reflect push and hold operation and warranty updates)

Important information: The wiring harness for the 600 series has (4) wires that need to be connected. Connect them as follows:

1. Green in front - ground (For switch light)
2. Green in rear - ground
3. Red - Ignition (20 amp fuse or larger)
4. Black or orange or red w/ black tracer (Ignition, connect w/ red wire listed above)
