Dear Madam, Sir,

Webasto Thermo & Comfort SE wishes you a lot of pleasure when driving with your newly installed H300 Entry / Comfort sunroof. Your sunroof is a new generation quality product from Webasto Thermo & Comfort Benelux. This new generation sunroof is available in 2 models, ENTRY and COMFORT.

Below you will find all you need to know about this H300 Entry / Comfort tilting and sliding sunroof. In order to obtain the maximum enjoyment from the sunroof, please read these instructions carefully. Wishing you happy motoring.

SWITCH

The sunroof can be operated by a 3 button switch with self explanatory symbols. You can either tilt, slide or close the glass panel.

The switch for the ENTRY model comes in black only. The COMFORT model switch comes in black with a metal accent and LED illuminated symbols.

OPERATION

Ensure that your vehicle ignition is switched ON.

SLIDE OPEN (Entry version and Comfort version)

By continuously pressing the button  the glass panel will move in the OPEN direction (fig. A1). The movement of the panel continues as long as the button is pressed. The panel stops when the button is released (fig. A2) or the FULL SLIDE OPEN position is reached.

ONE TOUCH SLIDE OPEN (Comfort version only)

By pressing the button  briefly (max. 0.3 seconds) the glass panel will move automatically towards the FULL SLIDE OPEN position (fig. A3). The panel stops when any of the buttons are pressed (fig. A4) or when the FULL SLIDE OPEN position is reached.

TILT (Entry version only)

By continuously pressing the button  the glass panel will move in the TILT direction (fig. B1). The movement of the panel continues as long as the button is pressed. The panel stops when the button is released (fig. B2) or the FULL TILT position is reached.

ONE TOUCH TILT (Comfort version only)

By pressing the button  briefly (max. 0.3 seconds) the glass panel will move automatically towards FULL TILT position (fig. B3).

The panel stops when any of the buttons are pressed or when the FULL TILT position is reached.

2 STEPS TILT (Comfort version only)

By continuously pressing the button  the glass panel will move in the TILT direction in 2 steps (fig. B4). The 2 step function allows the user to find the most comfortable tilt position easily. The movement of the panel continues as long as the button is pressed. The panel stops when the button is released or the FULL TILT position is reached.

CLOSE (Entry and Comfort version)

By continuously pressing the button  the glass panel will move towards CLOSE position (fig. C1 and C2). The movement of the panel continues as long as the button is pressed. The panel stops when the button is released (fig. C3) or the FULL CLOSE position is reached.

ONE TOUCH CLOSE (Comfort version only)

By pressing the button  briefly (max. 0.3 seconds) the glass panel will move automatically towards the FULL CLOSE position (fig. C4 and C5).

The panel stops when any of the buttons are pressed or when the FULL CLOSE position is reached.

NOTE

It is NOT possible to select TILT from SLIDE position directly (fig. D2). In that case the glass panel will not move.

You should always press the button  (CLOSE) first (fig. D1).

ADDITIONAL FEATURES

JAMMING PROTECTION (Safety Feature)

Entry version:

Should the glass panel encounter an obstacle while closing from SLIDE position, it automatically stops.

Comfort version:

The jamming protection becomes active when the sunroof is closed either by CLOSE, ONE TOUCH CLOSE or AUTO-CLOSE.

Should the glass panel encounter an obstacle while closing, it automatically opens again.

AUTO-CLOSE (Comfort version only)

When turning off your vehicles ignition, the AUTO-CLOSE will be activated. After three seconds the sunroof will close automatically.

Should you require the sunroof to stop, while closing, press any of the buttons briefly. You can also prevent the panel from closing by pressing any of the buttons within the three second interval.

When you switch the ignition on, the sunroof can be operated in the normal manner.

ILLUMINATION (Comfort version only)

The switch is equipped with 4 colour LEDs (white, green, blue and red) to allow for the best match with the factory set instrumentation colouring. The default colour setting is white. If not already done you can ask your installer to change the colour.

WIND DEFLECTOR (Comfort version only)

In order to reduce wind noise and buffeting the sunroof is equipped with a wind deflector. The wind deflector will automatically pop up in SLIDE position.

SUNROLLO (Comfort version only)

In case your roof is equipped with a sunrollo, it can be set by hand to the desired position (open or closed).

When the sunrollo is closed, press the handle to release it from the frame of the sunroof. Then, move the sunrollo backward (fig. D3).

When the sunrollo is open, move the sunrollo forward to close it. Click the handle into the frame of the sunroof.

The sunrollo fabric is of an open mesh structure which enables a certain level of air flow. This allows driving with the sunrollo closed for protection against direct sunlight, while having the sunroof open to enjoy the fresh air.

However, there is a limit to this. The air flow depends on the shape of the vehicle and increases with the vehicle speed, while the maximum air flow through the sunrollo is limited.

Due to this airflow the sunrollo will be lifted slightly and vibrate. This phenomenon is normal and will become more noticeable with increasing speed.

For this reason we recommend to open the sunrollo with the glass panel in OPEN or TILT position, while driving at higher speeds (> 80 km/h). Otherwise it might happen that air pressure dislocates the sunrollo.

MAINTENANCE

Generally, no maintenance is required.

GLASS PANEL

To clean the glass panel use only a mild, non-abrasive detergent and a brush or sponge. When starting your journey you are advised not to open the sunroof during the first few minutes if there is moisture on the panel. Webasto recommends first driving with the sunroof closed until all moisture has evaporated.

WARRANTY

Webasto Thermo & Comfort SE warrants the quality and correct operation of this H300 Entry / Comfort sunroof. The warranty covers both parts and labour and is valid for three (3) years starting from the date of installation.

Installation, online product registration and /or service should be executed by a Webasto Authorized Installer.

Defects caused by rough handling, incorrect use, accident and broken glass are not covered by this warranty.

Transportation costs are at the responsibility of the owner.

Proof of original purchase and date of installation are required to receive warranty service.

All obligations of Webasto Thermo & Comfort SE under this warranty shall be terminated if:

- Installation and / or Service is performed by someone other than a Webasto Authorized Installer.
- The product is modified or altered in a way not approved by Webasto.
- The owner cannot produce evidence of original purchase and installation date.

In multilingual versions the English language is binding.

The telephone number of each country can be found in the Webasto service centre leaflet or the website of the respective Webasto representative of your country.

Im Fall einer mehrsprachigen Version ist Englisch verbindlich.

Die Telefonnummer des jeweiligen Landes entnehmen Sie bitte dem Webasto Servicestellenfaltblatt oder der Webseite Ihrer jeweiligen Webasto Landesvertretung.

Bij een meertalige versie is de Engelse versie bindend.

Het telefoonnummer van het betreffende land kunt u vinden op het Webasto Servicepuntenoverzicht of de website van de Webastovestiging in uw land.

Dans le cas d'une version rédigée en plusieurs langues, l'anglais est alors la langue qui fait foi.

Pour trouver le numéro de téléphone du pays concerné, veuillez consulter le dépliant des points-service Webasto ou la page web de la représentation Webasto de votre pays.

En documentos multilingües, se considera vinculante el texto en inglés.

Puede encontrar el número de teléfono del país correspondiente en el folleto de servicio de Webasto o en la página web del representante de Webasto en su país.

Este manual está traduzido em vários idiomas, tendo o inglês como idioma padrão.

O número de telefone dos respetivos países deve ser consultado no desdobrável sobre os pontos da assistência técnica da Webasto ou na página web do seu respetivo representante nacional Webasto

This product can be registered by visiting www.techwebasto.com or by scanning the code.
A proof of purchase is required for all products that are not registered.
